PROFESSIONAL SUMMARY

HNDIT undergraduate with practical academic experience in software and web application development, with knowledge of Java, PHP, JavaScript, HTML, CSS and MySQL. Developed a Smart Hospital & Pharmacy Management System as a final project, covering hospital reception, doctor checking and pharmacy management processes. Also developed a Hotel Management System using NetBeans. Interested in software development and seeking an internship opportunity to apply programming, database management and problem-solving skills in a professional environment.

EDUCATION

- Sri Lanka Institute of Advanced Technological Education

Higher National Diploma in Information Technology (HNDIT)

Aug 2024 – Present

Relevant Coursework: Object-Oriented Programming, Software Engineering, Database Management Systems, Web Development, Quality Assurance

- Ke/Dhehi/Rajasinghe Central College, Ruwanwella

G.C.E. Advanced Level Examination – Arts Stream

2022

- Dr. N. M. Perera Central College, Yatiyantota

G.C.E. Ordinary Level Examination

2018

TECHNICAL SKILLS

- Programming Languages: Java, JavaScript, PHP, C++
- Web Technologies: HTML, CSS
- Database: MySQL
- Development Tools: NetBeans, VS Code
- Technical Knowledge: Object-Oriented Programming, Software Engineering, Database Management, Software Quality Assurance

PROJECTS

- Smart Hospital & Pharmacy Management System

Final Year Project | Java, PHP, HTML, CSS, JavaScript, MySQL

Developed a management system covering hospital reception, doctor checking and pharmacy management processes. Implemented functionality for managing patients, appointments, doctors, prescriptions and pharmacy operations. Designed and managed the MySQL database to support hospital and pharmacy-related data. Developed web-based interfaces using HTML, CSS and JavaScript. Applied software engineering, database management and object-oriented programming concepts throughout the development process.

- Hotel Management System

Academic Project | Java, NetBeans

Developed a hotel management application using Java and NetBeans. Applied object-oriented programming concepts to organize the application structure and functionality. Implemented system functionality to support hotel management operations.

CORE STRENGTHS

- Problem Solving
- Analytical Thinking
- Teamwork
- Communication
- Ability to Learn New Technologies

LANGUAGES

Sinhala: Native

English: Excellent / Professional Working Proficiency
